Abstract: This work is the continuation of that carried out previously which has already been published. This is the result of the ethnographic field research carried out in the Treviño enclave. Previously, the following themes were researched on and published: festivities, popular religiousness, stories and legends, guilds, traditional agriculture and river fishing. In this occasion the fields studied have been: houses and annexes, families, food, dress, games, popular medicine, cattle rearing and popular veterinary science, and work concludes with an ample bibliography and the transcription of old documents related with some of these themes.

Key Words: Treviño. La Puebla. Ethnography. House. Family. Food. Dress. Games. Popular medicine. Cattle rearing. Popular veterinary science.
